

A.S.A Music Player

Awesome Sunshine Ascending

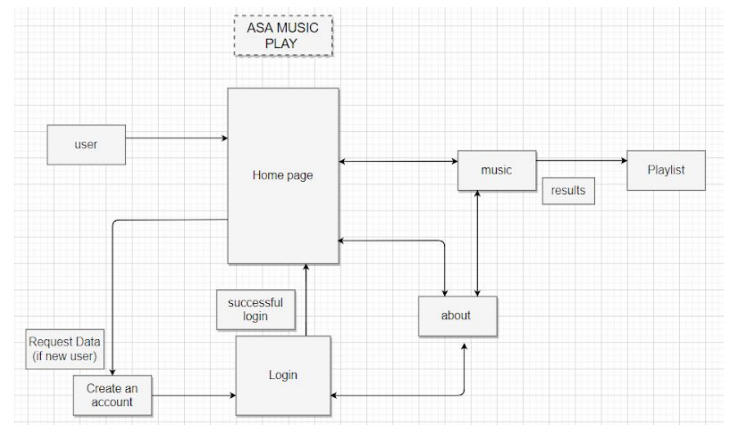

ASA Product

- - - - x

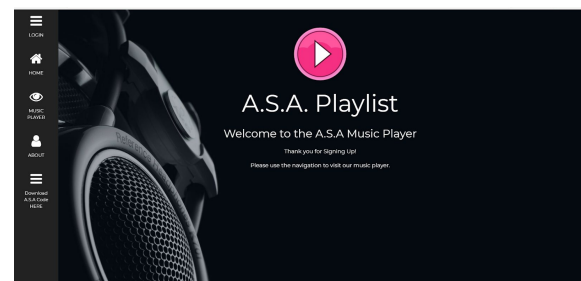

The ASA Music Player is a playlist that acts as a radio player. Once you start playing music, ASA Music Player puts the rest of the control into your hands. You can pause, stop, play the previous or next song, and drag the progress meter so you can hear your favorite parts over again. The simple sleek design of this app makes it easy for anyone to use. All you need to do is subscribe with the first 6 months free. We won't even ask for your payment details until your 6 month trial is over.

Team ASA was created by 3 individuals:
Angela Kihiko, Stephanie Obwar, and Angela Stewart

FEATURES. SYSTEM REQUIREMENTS.

- - - - X

In this fully functioning radio player, you will have full control over this radio style player. Unlike any other radio player users can:

- Play: once the music starts, the control is in the users hand.
- Pause: users can pause/stop the song at any point during the song.
- Play the previous song: a user can go back to another song with the backward button.
- Play the next song: users can go to the next song with the forward button.
- Replay: any song in the radio can be replayed unlimited number of times.
- Progress meter: know how much time is left in the song and where your favorite parts are time stamped.

What do you need to use the ASA Music Player?
